Architecture & Domains: **OWASP Mobile Security** · **WCAG 2.2** · ISO 18013-5 · Bluetooth · Fintech · Feature Flags (LaunchDarkly) · Modular & Clean Architecture · E2E · **Agile / SAFe** · **Design System** · GraphQL

Work Experience

Senior Mobile Engineer | Jul 2024 – Present

Essent, 's-Hertogenbosch, Netherlands

- Led **React Native feature development**, working with Product Owners and stakeholders from discovery to delivery.
- Maintained and scaled the mobile platform through code quality improvements, reviews, and developer onboarding.
- Implemented **WCAG 2.2 AA accessibility**, achieving certification by **Stichting Accessibility**.
- Migrated the app to **Expo**, designed **CI/CD pipelines**, and led feature-flag migration to **LaunchDarkly**, authoring ADRs for platform decisions.
- Supported live operations with **on-call duties**, Sentry monitoring, and critical bug fixes.
- Delivered key features including **real-time energy consumption insights** and payment adjustments, improving user experience and App Store ratings.

Mobile App Developer | Jun 2022 – May 2024

Elements Interactive B.V., Almere, Netherlands

- Developed mobile applications across **iOS, Android, and React Native** for in-house and enterprise projects, translating requirements into scalable, maintainable solutions.
- Owned development of **Podwalks**, a white-label location-based audio tour app, building shared mobile infrastructure and ensuring long-term stability.
- Served as a mobile consultant on the **Kiwa eWallet (Android)**, implementing secure credential sharing via **Bluetooth, NFC**, and **ISO 18013-5** standards.
- Contributed as a React Native consultant on the **Intergamma (GAMMA & Karwei)** mobile apps, delivering new features, UX improvements, and ongoing maintenance.
- Strengthened mobile architecture through **modularisation, code quality practices, and reliable tests**, resulting in more stable releases and increased client confidence.

Lead Mobile Developer | Jun 2019 - Jan 2021

Inficare Pvt. Ltd, Gairidhara, Kathmandu

- Led **end-to-end development** of 15+ mobile apps across fintech, remittance, and enterprise domains, supervising a team of 10 mobile developers.
- Designed and finalised **UI/UX** with clients, ensuring seamless experiences across iOS and Android.
- Built **iRemit Customer App** and integrated **EKYC system**, enabling secure identity verification.
- Implemented **OWASP Mobile Security**, achieving successful **FSI VAPT approval** in Japan, Korea, and Malaysia.
- Defined coding standards, architecture, and modular components, improving maintainability and overall app quality.
- Delivered features that supported business growth and received client commendations for **technical leadership, enhancing app quality, and delivering reliable mobile solutions**.

iOS Developer | Jan 2018 - Jun 2019

Inficare Pvt. Ltd, Gairidhara, Kathmandu

- Developed the company's **first iOS applications**, including **Paywell Mobile Wallet** and **iRemit Customer App**, establishing Inficare's mobile footprint.
- Collaborated with Product Managers and designers to translate requirements into scalable mobile solutions.
- Introduced **Git** for version control, replacing SVN, and improved team workflow and collaboration.
- Explored emerging technologies and shared findings with the mobile team to improve development practices.

Additional Projects

- **Lugmety** – Food delivery logistics app (iOS)
- **Smart NRNA** – Community app for Non-Resident Nepali (iOS, Android)

Core Strengths

- Technical leadership
- Product-focused problem solving
- Cross-functional collaboration
- Ownership mindset

Interests

Pottery · Ukulele · Hiking · Travel · Food

Languages

Nepali (Native) · **English** (Fluent) · **Dutch** (Learning)
