

PRASHANT SHRESTHA

Senior Mobile Engineer | iOS · Android · React Native

Amsterdam, Netherlands · +31 641599247 · prashantlurvs@gmail.com · www.prashantshrestha.nl · github.com/prashantLalShrestha · linkedin.com/in/prashant-shrestha

Overview

Senior Mobile Engineer with over **6 years of experience** delivering high-quality mobile applications across **iOS, Android, and React Native**. Strong background in **architecture, security, accessibility, and platform scaling**, with hands-on experience from product design through production and live operations. Thrives in cross-functional, agile environments and complex problem spaces.

Skill Highlights

Mobile: iOS · Android · React Native

iOS: Swift · UIKit · **SwiftUI** · TCA · Core Data/**SwiftData** · Combine · Async/Await · **XCTest** · Instruments

Android: Kotlin · **Compose** · Coroutines · MVVM · Room · Ktor · **Kotlin Multiplatform** · Hilt · JUnit · **Espresso**

React Native: Typescript · **Redux** · **Storybook** · Expo · Reanimated · React Query · Jest · Detox · **Maestro**

CI/CD & Release Ops: GitLab CI · **SonarQube** · **Fastlane** · TestFlight · Play Console · **Sentry** · Crashlytics · EAS · Feature Flags (LaunchDarkly)

Security & Compliance: OWASP Mobile Security · ISO 18013-5 · Fintech / banking domain · FSI VAPT approval (Japan, Korea, Malaysia)

Also: WCAG 2.2 accessibility · Bluetooth · Modular & Clean Architecture · E2E · Agile / SAFe · Design System · AI Skills & Agentic development

Work Experience

Senior Mobile Engineer | Jul 2024 – Present

Essent, 's-Hertogenbosch, Netherlands

- Owned end-to-end delivery of customer-facing app feature, partnering with Product Owners and cross-functional teams from discovery through release in a fast-paced Agile/Scrum environment.
- Drove code quality across a large mobile codebase through code reviews, modular architecture, engineering standards, mentoring, and developer onboarding.
- Implemented **WCAG 2.2 AA accessibility** across the app, achieving official certification — reflecting close attention to UI/UX detail and customer-facing polish.
- Improved engineering productivity by designing **CI/CD pipelines**, leading **LaunchDarkly** feature-flag adoption, and authoring **Architecture Decision Records** (ADRs) to support scalable platform development.
- Led the migration of the existing React Native app to **Expo**.
- Supported production systems through **on-call rotations**, Sentry monitoring, and rapid issue resolution, contributing to operational excellence and release reliability.

Mobile App Developer | Jun 2022 – May 2024

Elements Interactive B.V., Almere, Netherlands

- Built and shipped scalable mobile applications across **iOS, Android, and React Native**, translating product requirements into maintainable, testable, and high-quality software.
- Owned end-to-end development of **Podwalks**, a white-label location-based audio tour app, building reusable shared infrastructure that supported multiple branded releases.

- Acted as mobile security consultant on the **Kiwa eWallet (Android)**, implementing secure credential sharing via **Bluetooth, NFC** using **ISO 18013-5**.
- Delivered new features and UX improvements as a consultant on the **Intergamma (GAMMA & Karwei)** retail app.
- Improved release quality through modularisation, increased automated test coverage, code reviews, and engineering best practices.

Lead Mobile Developer | Jun 2019 - Jan 2021

Inficare Pvt. Ltd, Gairidhara, Kathmandu

- Led **end-to-end delivery** of 15+ mobile applications in fintech and remittance, mentoring a team of 10 mobile developers while maintaining high engineering standards.
- Partnered directly with clients on UI/UX design, prioritising seamless, highly polished customer experiences across iOS and Android.
- Built **RemitX Customer App** and integrated **EKYC identity-verification system**, enabling secure identity verification.
- Implemented **OWASP Mobile Security practices**, achieving **FSI VAPT** security approval across Japan, Korea, and Malaysia — banking-grade security clearance.
- Defined coding standards, modular architecture, and iOS design patterns (MVC/MVVM), raising code quality through reviews, mentoring, and engineering best practices.

iOS Developer | Jan 2018 - Jun 2019

Inficare Pvt. Ltd, Gairidhara, Kathmandu

- Developed the company's **first iOS applications**, including **Paywell Mobile Wallet** and **iRemit Customer App**, establishing Inficare's mobile footprint.
- Collaborated closely with Product Managers, designers, and engineers to deliver scalable, customer-focused iOS features with an emphasis on quality and usability.
- Introduced **Git** for version control, replacing SVN, and improved team workflow and collaboration.
- Tracked and shared emerging Apple/iOS technologies with the team to keep development practices current.

Additional Projects

- **Lugmety** – Food delivery logistics app (iOS)
- **Smart NRNA** – Community app for Non-Resident Nepali (iOS, Android)
